Sorry, Geoff, one other quick question: are you aware of any guidance that EPA released for travelers to the U.S. Virgin Islands regarding pesticide exposure?

Thanks.

Hi Geoff,

Great to meet you earlier today – thanks for all of your help and useful information.

As we discussed when we met, we were hoping you might be able to provide us with some information:

- Confirmation of all locations in USVI that the company used methyl bromide within the past year, particularly residential locations
- Details of the sampling plan, methodology, and any preliminary results that are available. Ideally, if we could get this in a spreadsheet format, that would be great.
- Details of your venting plan and execution for the fumigated unit
- Is there a convenient way for you to send us the pictures which you took of the facility?

Thanks very much for your help,

Prathit
